AIRLESS JETSPRAY

A BETTER WAY TO APPLY ROOF COATING

Patent No.
3,203,631

It is estimated that about 500,000,000 gallons of roof coating was applied in this country last year.

JETSPRAY IS DESIGNED AND BUILT TO APPLY COATINGS WELL AND EFFICIENTLY. **Consider these advantages:**

JETSPRAY costs less to buy and maintain because it does not require an air compressor, and being airless, overspray is virtually eliminated.

JETSPRAY does not require skilled labor, which reduces application cost.

JETSPRAY agitates, pumps and sprays any liquid, including white, abrasive, fibrous, asphalt-base and emulsions, with controlled pressure and adjustable output.

JETSPRAY is driven by a 4 H.P. gasoline engine equipped with a V-Plex friction clutch power take-off.

JETSPRAY is built to give long dependable service.

JETSPRAY is fully guaranteed one year against defective material and workmanship: plus a ten day refund if not satisfied, less freight charges, provided it is returned in good condition.

So for more profit, coat the modern way with JETSPRAY!

TIME PROVEN

The heart of JETSPRAY is this ingenious ROTOR-STATOR pump. It has no pistons to leak, nor gears to wear. It has only one highly wear-resistant helical moving part which produces controlled pressures up to 250 pounds, and adjustable output up to 7 gallons per minute!

This steel nozzle is designed to produce a fan-like spray, which assures uniform coating application. These nozzles are available in various sizes.

SPECIFICATIONS	
HEIGHT	44 INCHES
LENGTH	54 INCHES
