INVENTED, DESIGNED AND BUILT BY A LICENSED ROOFER.

Consider these advantages:

TANK: Capacity 130 gallons. Built-in screen at outlet, and tank-length agitator, to ensure uniform mixture and less clogging in line.

AIRLESS: Lower initial cost. Reduces overspray. Saves on labor and maintenance costs over 50%.

POWERED: By 4 hp. engine, with V-PLEX friction clutch power take-off (uses less than 1 quart of gasoline per tank of coating). Adjustable pressure up to 250 psi. Output up to 7 gallons per minute.

WEIGHT: Only 400 lbs. Thus easy to transport.

GUARANTEED: 1 year against defective material and workmanship; plus 10 day money-back guarantee if not satisfied, less freight, provided machine is returned in good condition.

For further information, tear off attached card and return it to us with your name and address.
