New! 'JETSPRAY' Airless Roof Coating Machine!

JETSPRAY

JETSPRAY PRODUCTS INC., 2223 EL CAJON BLVD., SAN DIEGO, CALIFORNIA 92104 • TELEPHONE 295-9501

NOW YOU CAN JETSPRAY YOUR WAY TO BET

JETSPRAY uses a pumping principle that combines simple design and rugged construction in an **airless** roof-coating machine. JETSPRAY is a single-unit machine requiring one operator on the roof who maintains absolute flow control with ease at the nozzle. An adjustable pressure relief valve system feeds material back to the tank when flow is shut off at the nozzle.

JETSPRAY is powered by a small gasoline engine turning a helical pump that produces a steady flow of material even during intermittent operation.

Coating materials may be taken directly from drums or added to the tank unit, in which a built-in agitator keeps material evenly mixed throughout application.

Portability is a prime JETSPRAY feature since the tank, pump, and engine are all contained in the single unit. Transportaton to the jobsite is almost as easy as driving there in a car.

JETSPRAY SPECIFICATIONS

Tank Capacity	130 gal.
Weight	400#
Height	44″
Width	28″
Length	54″
Output Volume	up to 6 gal. per min.
Pressure	up to 200 psi

JETSPRAY sells itself—with these exclusive "je

HIGHER PROFITS—one-man operation on roof cuts labor costs in half.

LOWER INITIAL COST—costs less to own than any comparable coating machine in its field.

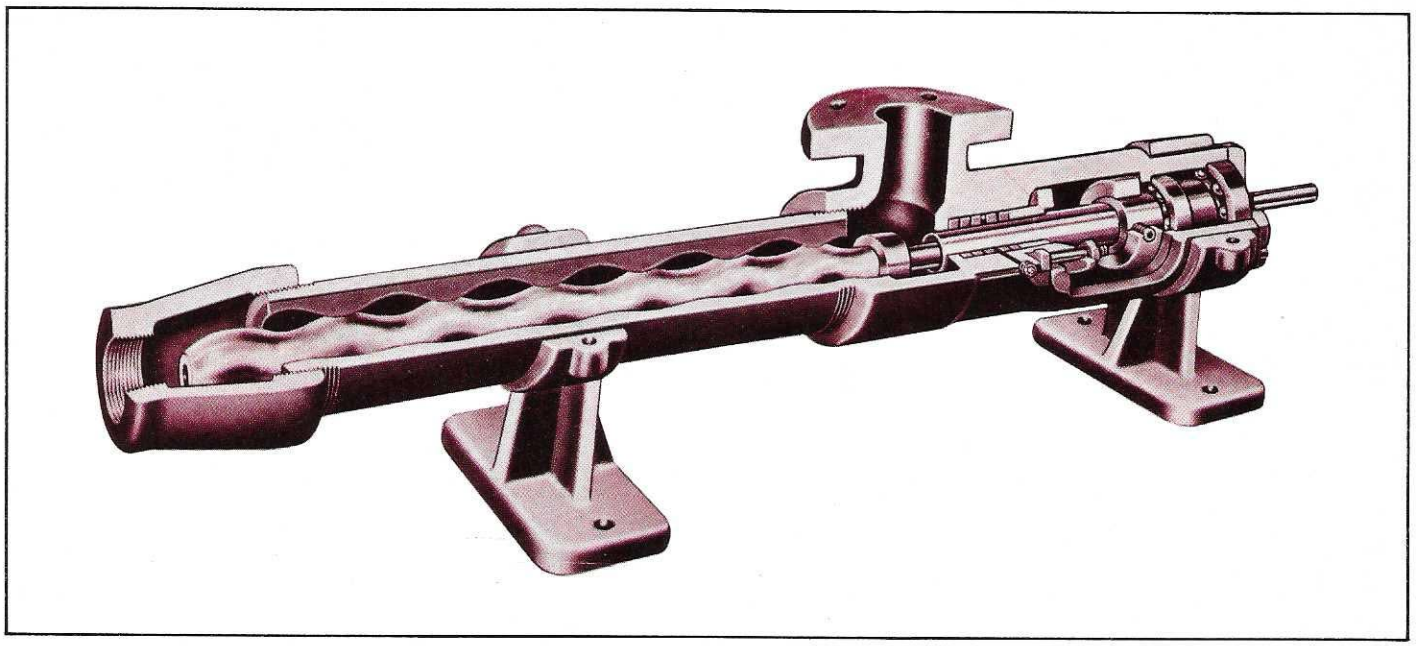

ECONOMICAL AIRLESS OPERATION—JETSPRAY'S rugged helical gear pump eliminates expensive air compressors. Powered by a small gasoline engine with friction clutch power take-off, requires only one hose and a single operator—saves you fuel, labor, maintenance and clean-up time.

PROVEN RELIABILITY—invented by a licensed roofer, patented (U.S. Pat. No. 3,203,631) and tested under severe conditions.

HIGH PERFORMANCE—single operator applies up to 6 gallons per minute—360 gallons per hour at up to 200 pounds per square inch.

FLEXIBILITY—can be used for a wide variety

ER JOBS AT LOWER COST FOR MORE PROFIT

JETSPRAY's helical gear pump impels virtually anything that flows, from tough abrasives and emulsions to light cleaning solvents. The helical pump has just one moving part — a screw-like rotor that rolls within a shaped housing delivering material to the operator under uniform pressure at a constant flow rate.

The helical pump is self-priming and self-cleaning. Pump maintenance is held to a minimum; unique tubular construction makes stator changes quick and easy.

JETSPRAY expands your coating capability. One roof operator, one machine applies medium viscosity

- abrasives
- emulsions
- asphalt base coatings including fine fibres
- vinyl and acrylic coatings
- hypalon
- fireproofing for shingles or shakes
- dampproofing and foundation waterproofing materials

and it self cleans with even the lightest weight solvents

age" features:

of coatings — almost anything that flows.

BUILT TO LAST — basic unit has only 2 moving parts, low replacement costs, and sturdy steel construction add years of profitable service.

EASY TO OPERATE — minimum instruction required, any of your crew can operate.

EFFICIENT — spray is controlled even in tight corners, without overspray common to air powered sprayers. Puts the coat in where you want it.

UNIFORM APPLICATION — full-length tank agitator ensures uniform mixing and continuous, even application.

SELF CLEANING—preparation and clean-up time cut significantly with JETSPRAY's self-cleaning features.

COMPACT DESIGN — easily transported, JETSPRAY combines all coating equipment needed for the job in a single, sturdy unit.

FREE TRIAL — try JETSPRAY on your next job — on our 10-day, money back guarantee plan.

JETSPRAY— Job Proven by the roofing industry

"In the past 18 months, we have coated over 200 roofs using, your JETSPRAY equipment. Our firm specializes in applying white abrasive coatings . . . we have found that JETSPRAY applies these coatings better than any previous equipment we have used."

Hutchinson Roofing Company
La Mesa, California

"We have used a JETSPRAY coating machine for over a year. Our experience has proven that with JETSPRAY our labor savings alone exceeds 50% and preparation and clean-up time has been cut to a minimum. Operating maintenance of the machine, including gasoline and oil, averages less than 50c per roof.
"We highly recommend this machine."

J. H. Spratley Roofing Company
San Diego, California

Compare JETSPRAY's "Jet Age" features

LOWER INITIAL COST—
save up to 50% over other models

HIGHER CAPACITY—
three times the output of standard coating equipment

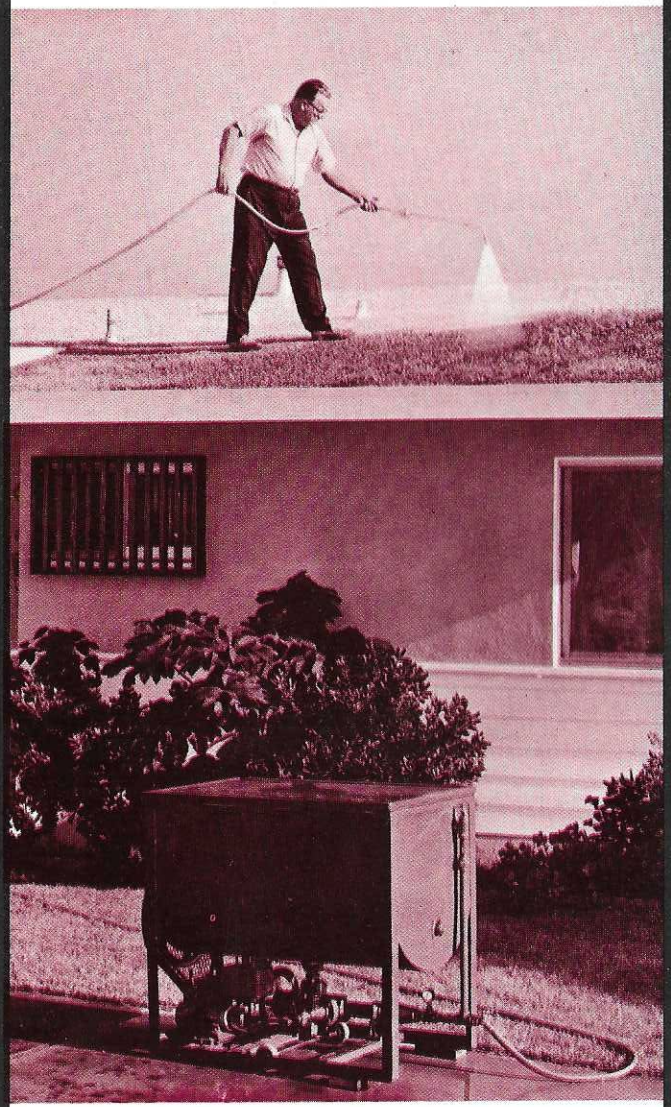

CUTS APPLICATION COSTS —
only one operator required

PATENTED AIRLESS OPERATION —
eliminates expensive air compressors

GREATER EFFICIENCY—
new helical gear pump reduces overspray, gives uniform application

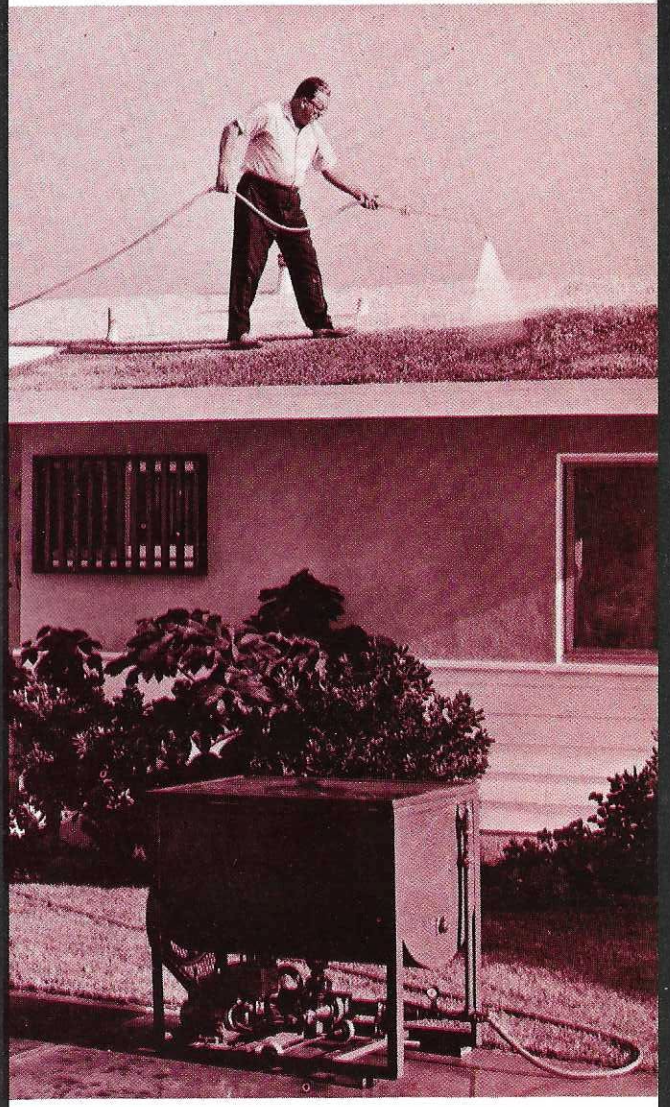

LOWER MAINTENANCE COSTS —
clean-up time cut by 30% — basic unit has only 2 moving parts
